

Information from 4D

Maths

This week we will be revising the 4x table and the associated division facts. The 4x table is double the 2x table. We will also be investigating the 40x table, the 400x table and the 0.4x table and seeing how they all relate.

Our other work this week will be using our number skills to solve word problems. The children will have to identify the maths needed, estimate a sensible answer and then choose a way to work out the answer. The children might use practical resources – counters, 100 squares, number lines etc or they might use jottings to help them work out the answer. They will also have to consider whether their answer is sensible or not.

English

Spellings this week are either tricky ways of making the 'sh' sound or different ways of making the 'ie' sound.

We are going to investigate and then write our own non fiction texts for the next two weeks. The children will identify the features of non fiction texts, investigate the ways in which the texts are organized and find out how information is put together in paragraphs. We will continue to work on punctuation as the children are finding it quite difficult to remember full stops and capital letters when they are writing longer pieces of work.

Notices

The children should have had their photos taken today!

Parents' consultations are next week. I sent out the times last week – please check your child's book bag if you haven't seen the slip yet. Otherwise I have a master list in the classroom.
