

Information from 4D

Maths

We are still working on adding and subtracting and memorising those number facts. Our times table for this week is the 6x table. We will also be learning the associated division facts.

Our main focus this week is shape; both 2D and 3D. We will be sorting shapes by looking at the lines of symmetry, the number of right angles and whether they are regular (all sides and angles the same) or irregular. We will be making nets of some 3D shapes and making sure that we can recognise the 3D shape from a picture or photo of it.

English

Having spent time investigating how adjectives and adverbs can set the mood of a setting, this week we are going to have a go at writing a whole story and making sure we use these techniques in our writing. As well as just using adjectives, we have looked at words that go with them to make them stronger or weaker, so your garden might be quite pretty or very pretty or extremely pretty. Please help the children spot these in their reading as well.

Notices

We will be planting the beans this week, so if you haven't yet brought in a jar now is the time to do so.

Just a reminder:

Spelling books brought back to school on Friday.

Learning Logs brought back to school on Tuesday.

Maths HW books brought back to school on Thursday.
